

NEO-OXY 100/100 MR - neomycin sulfate and oxytetracycline hydrochloride powder
PennField Oil Company

Enter section text here

ACTIVE DRUG INGREDIENTS:

Oxytetracycline Hydrochloride 100 g/lb.

Neomycin Sulfate 100 g/lb.

MIXING AND USE DIRECTIONS

Mix Neo-Oxy 100/100 MR with nonmedicated milk replacer to provide the following concentrations:

CALVES (milk replacer) - For calves (up to 250 lb) for increased rate of weight gain and improved feed efficiency.

Oxytetracycline and Neomycin Amount: 0.05-0.1 mg/lb of body weight daily. Feed continuously; in milk replacers or starter feed.

Lb of Neo-Oxy 100/100 MR per ton of Type C Medicated Feed (1): 0.1-0.2 (2)

RESIDUE WARNING: Zero day withdrawal. Use of more than one product containing neomycin or failure to follow withdrawal times may result in illegal drug residues.

For calves (up to 250 lb) for treatment of bacterial enteritis caused by *E. coli* susceptible to oxytetracycline; treatment and control of colibacillosis (bacterial enteritis) caused by *E. coli* susceptible to neomycin.

Oxytetracycline and Neomycin Amount: 10 mg/lb of body weight daily. Feed continuously for 7-14 days in milk replacers or starter feed. If symptoms persist after using 2 or 3 days, consult a veterinarian. Treatment should continue 24 to 48 hours beyond remission of disease symptoms.

Lb of Neo-Oxy 100/100 MR per ton of Type C Medicated Feed (1): 20 (2)

RESIDUE WARNING: A withdrawal period has not been established for use in preruminating calves. Do not use in calves to be processed for veal. A milk discard time has not been established for use in lactating dairy cattle. Do not use in female dairy cattle 20 months or older. Withdraw 5 days before slaughter. Use of more than one product containing neomycin or failure to follow withdrawal times may result in illegal drug residues.

CALVES, BEEF CATTLE, AND NONLACTATING DAIRY CATTLE

For treatment of bacterial enteritis caused by *E. coli* and bacterial pneumonia (shipping fever complex) caused by *Pasteurella multocida* susceptible to oxytetracycline; treatment and control of colibacillosis (bacterial enteritis) caused by *E. coli* susceptible to neomycin.

Oxytetracycline and Neomycin Amount: 10 mg/lb of body weight daily. Feed continuously for 7-14 days in feed or milk replacers.

If symptoms persist after using 2 or 3 days, consult a veterinarian. Treatment should continue 24 to 48 hours beyond remission of disease symptoms.

Lb of Neo-Oxy 100/100 MR per ton of Type C Medicated Feed (1): 20 (2)

RESIDUE WARNING: A withdrawal period has not been established for use in preruminating calves. Do not use in calves to be processed for veal. A milk discard time has not been established for use in lactating dairy cattle. Do not use in female dairy cattle 20 months or older. Withdraw 5 days before slaughter. Use of more than one product containing neomycin or failure to follow withdrawal times may result in illegal drug residues.

(1) Mixing directions are for example only and are based on mixing 1 lb of dry milk with 1 gallon of water.

(2) If calf weighs 100 lb, consuming 1 gallon of milk replaced per day.

FOR USE IN DRY FEEDS ONLY. NOT FOR USE IN LIQUID FEED SUPPLEMENTS.

Store at 25 Degrees C (77 Degrees F) with excursions permitted to 37 Degrees C (98.6 Degrees F)

Restricted Drug (California) - Use Only as Directed

Not For Human Use
